## Summary

---

- Full Stack Developer, passionate about web design and development. Experienced in developing, testing, and debugging web applications using a variety of languages and frameworks. Skilled in problem-solving, self-learning, and adapting to new situations. Strong communication and teamwork abilities with a proven track record of delivering high-quality products within deadlines

## Technical Skills and Interests

---

- **Programming Languages:** Typescript, JavaScript, C#, Basic Java
- **Web Technologies:** HTML5, CSS3, Node.js
- **Frameworks:** Angular 2+, .Net, Express.js
- **Databases:** MySQL, SQL Server, MongoDB
- **Web Dev Tools:** Git, Github, Gitlab, Visual Studio, Visual Studio Code, Postman, SQL Profiler, Jira, SSMS, Figma
- **Areas of Interest:** Web Design and Development
- **Soft Skills:** Problem Solving, Self-learning, Presentation, Adaptability

## Highlights of Skills

---

- Experienced in developing, testing, and debugging web applications with different languages, web Technologies, and databases including Typescript, JavaScript, HTML5, CSS3, Angular, ASP.NET, C#, MySQL, SQL Server.
- Solid understanding to be able to design and develop unique user interfaces using HTML5, CSS, TypeScript.
- Proficient in programming modules for the back-end side of web and enterprise solutions using strong knowledge of Java, JavaScript, .NET Core, and MySQL.
- Experienced in using team collaboration, version control systems, and bug tracking systems, including Jira and Git repository.
- Proficient in utilizing various frameworks and open-source software for developing various use cases including Angular, .Net Core, and ASP .NET Core.
- Able to implement analysis and design skills based on methodologies such as UML and Agile Software Development, create and manage sprints using Jira
- Can easily adapt to new situations and work as required.
- Able to learn new programming languages quickly and easily.

## Education

---

- **Post Graduation Diploma in Web Development** Sep 2023 - Present  
Conestoga College of Technology and Advanced Learning.
- **Bachelor of Technology in Computer Science** July 2016- September 2020  
Viswajyothi College of Engineering and Technology, Kerala, India
  - Project on 'Anti-phisher: A phishing link detection application.' using machine learning techniques.
  - Maintained a 7.79 overall CGPA.

## Experience

---

- **Freelance Web Developer** August 2023 – Present
  - Freelance Projects
  - Completed numerous successful freelance projects on platforms like Upwork, Freelancer.com, and Fiverr.
  - Effectively communicated with clients to understand project requirements, provide updates, and ensure client satisfaction throughout the development process.
  - Developed strong problem-solving skills through debugging, troubleshooting, and resolving issues in web applications to ensure smooth functionality.
  - Demonstrated adaptability in a fast-paced environment, efficiently handling tight deadlines and a variety of tasks simultaneously.
- **Full-Stack Software Development Engineer** March 2021 – July 2023
  - CareStack, Trivandrum, India
  - Part of the core development team of CareStack™ - A web-based dental practice management System.
  - Accessing work requirements using agile and scrum principles.
  - Automated key workflows of Appointment that increased the practice revenue.
  - Experienced in database design and SQL performance improvement.
  - Code quality reviewing resulted in increased performance and code readability.
  - Responding to Production issues and resolving them in a time-bound manner.
  - Worked as a SCRUM MASTER of the scheduler section team.
  - Experienced with project management tool Jira.
- **Software Developer Intern** June 2017 – July 2017
  - Aumento Performers Solutions PVT. LTD, Ernakulam, India
  - Understanding work requirements and analyzing.
  - Introduction to Android development.

## Projects

---

- **CareStack**
  - All-in-one, cloud-based dental practice management software with builtin scheduling, clinical charting, patient financing, patient engagement and analytics.
  - Technology Used: HTML5, CSS, AngularJS, Angular 6, ASP.Net, C#, TypeScript.
- **CareStack Referral Portal**
  - Built in .net core app, used for communication between practices outside Carestack.
  - Contributed to the front-End development.
  - Technology Used: HTML5, CSS, Angular 14, .Net core, C, TypeScript, SQL Kata.
